

HRX4 Passive MVHR Unit

Features and Benefits

- Passive - no fans.
- Up to 70% heat recovery.
- Lightweight Polymeric heat exchanger.
- Spigots to suit 150mm Ø ducting and accessories.

The HRX4 is a passive remote mounting unit providing balanced ventilation with up to 70% heat recovery where there is no immediate access to an external wall. As the HRX4 has no fans, it is ideal for use with in-line fans and compatible accessories. The HRX4 comes with a metal frame.

Performance of HRX4: 280m³/h at 70% temperature efficiency (balanced airflow). Ideal installation above suspended ceiling within commercial applications.
